ReLoop.

Tested phones, laptops and parts, from Jammu's own loop.

WHY IT MATTERS

1.75 million tonnes
of e-waste in India in FY 2023–24[1]

1.94 million tonnes
estimated for FY 2024–25[1]

In Jammu, old phones and laptops pile up in repair shops, stores and offices. Much of it still works or can be fixed. ReLoop is a circular-economy venture started by students in Jammu: it buys from shops, retailers and institutions, tests everything, and keeps what still works in use.

WHAT YOU CAN DO

1. **Tested, wiped and graded**
   Every phone, laptop and monitor is tagged at our Jammu hub, tested, wiped and graded A to D. Grade A and B devices carry a 30-day warranty.

2. **Tested parts for technicians**
   Boards, screens, cameras, charging ports, RAM and SSDs, tested and listed on the Jammu Parts Exchange with a 7-day return.

3. **Colleges, schools, banks and offices**
   Book a lot pickup for old desktops, laptops and monitors. We sort on site, buy what works and give you a handover record.

We buy from shops, retailers and institutions only, not from homes. Anyone can buy from us.
